Subject: Proteomic analysis of wheat grain samples using high throughput approach on proprietary basis under Project Grant for Deptt. of Biochemistry – Inviting comments thereon.

An indent has been received from **Deptt. of Biochemistry**, Central University of Punjab, Bathinda for **Proteomic analysis of wheat grain samples using high throughput approach on proprietary basis** through M/s Valerian Chem Private Limited, New Delhi . The proposal submitted by M/s Valerian Chem Private Limited, New Delhi and Departmental PAC certifications are attached herewith.

The above documents are being uploaded for open information and to invite objections, comments, if any, from any manufacturer/ supplier/service provider firm regarding proprietary nature of the services within 10 days from the date of issuance of this notice giving **Reference No. PP - 25 dated 18.09.2019 (CUPB/19-20/SPO/1386)**. Objections/ Comments should reach Office of the Purchase Officer, Central University of Punjab, City Campus, Mansa Road, Bathinda – 151001 by post or through email procurement@cup.edu.in on or before 26.12.2019 failing which it will be presumed that no firm has any objection/ comment to offer and case will be decided on merits as per rules.

Date - 12-Dec-2019

This is to certify that we Valerian Chem Private Limited are the service provider for the Sample processing and the data analysis all over India. We provide the service for analyzing the samples from different source like chick, human, crop, bovine and many more protein source.

The reports are generated on the basis of our proprietary Technology and we would like to declare that in the best of our knowledge, provide high quality data and bioinformatics assistance

Thanking you

For Valerian Chem Private Limited.

Annexure C -Proprietary Article Certificate

As per Rule 166 GFR 2017 –

Single Tender Enquiry. Procurement from a single source may be resorted to in the following circumstances:-

- i. It is in the knowledge of the user department that only a particular firm is the manufacturer of the required Goods.
- ii. In a case of emergency, the required goods are necessarily to be purchased from a particular source and the reason for such decision is to be recorded and approval of competent authority obtained.
- iii. For standardisation of machinery or spare parts to be compatible to the existing sets of equipment (on the advice of a competent technical expert and approved by the competent authority), the required item is to be purchased only from a selected firm.

Note: Proprietary Article Certificate in the following form is to be provided by the Ministry/Department before procuring the goods from a single source under the provision of sub Rule 166 (i) and 166 (iii) as applicable.

- 1. The indented goods are manufactured by M/s... Valerian chem Pvt. Ltd
- 2. No other make or model is acceptable for the following reasons: High quality & reliable data analysis & proteomic runs are required which are compatible with previous analysis (see justification for details).
- 3. Concurrence of finance wing to the proposal vide :
- 4. Approval of the competent authority vide

It is certified that if any challenge/issue/complaint arises in view of this item on Proprietary basis at any stage. I R. Wusirika (Name) will be fully liable/responsible for the purchase.

Annexure D-Justification for purchase on Proprietary or Single Tender Enquiry Basis
(Give detailed justification regarding purchase of equipment and consumable for research)

Proteomic analysis involves running the protein samples on Liquid Chromatography – Mass Spectrometry/Mass Spectrometry (Orbitrap) for high resolution analysis. Quality control is very important to ensure the best possible results. This is followed by bioinformatic analysis of data which is crucial for good and publishable results in international scientific journals. The company, Valerian Chem Private Ltd. performed proteomic analysis of samples sent by Dr. Sandeep Singh (Dept. of Human Genetics and Molecular Medicine) and the results were good. I sent a sample (wheat grain proteins) to the company to perform proteomic analysis. The results of protein analysis of the control (untreated) sample were good and satisfactory. It is important to get good quality and reliable data for DST-SERB project.
